

# Flood Risk Consultant

As a graduate Flood Risk Consultant with 1+ year's previous experience in an appropriate field,, your skills are needed to help grow a successful Flood Risk Consultancy by assessing potential flood risks and help in the delivery of flood risk projects. **Are you equipped to take a key role in this growing company?**

You will be working on diverse range of flood risk projects from planning applications to property purchases through a wide range of public and private sector clients. The appointed Flood Risk Consultant will see projects through from conception to delivery.

As a supplier of flood risk management services in the UK, you will integrate with a forward thinking and highly skilled individuals and have the responsibility of leading and shaping solutions for clients.

## The role will require you to:

- Liaise directly with potential clients and provide a comprehensive quotation service and sales lead generation;
- Undertake Flood Risk Assessments, Flood Risk Consultancy, and Surface Water Drainage Strategies;
- As and when required, perform as a technical lead for 1D-2D fluvial hydraulic modelling commissions;
- Take a proactive approach to managing client relationships, clarifying expectations, success criteria and outcome measures in order to meet their requirements and deliver successful projects to time and budget;
- As and when required liaise and appoint other 3<sup>rd</sup> parties in the project process such as Local Planning Authorities, Environment Agency and other subcontractors. This may require attending meetings off site;
- Support Senior Management in building a successful brand and business to become a leading niche flood risk consultancy;
- Help to grow, lead and create a dynamic team by nurture, stretch and developing junior colleagues.

## Capabilities and Qualifications:

- A degree in Engineering or Environment;
- Experience in a previous similar role and a degree in a related subject;
- Preferably membership of CIWEM or ICE or be working towards membership;
- Good understanding of the importance of commercial awareness;
- Knowledge of SuDS concepts and design;
- Extensive experience in the preparation of flood risk assessments, integrating current sustainable urban drainage solutions to NPPF guidance;
- Technically competent in IT and various GIS packages;
- Strives to deliver an exceptional level of service to clients at all times;
- Excellent written report-writing and communication skills;
- Presentable, and with good presentation skills;
- Ability to front client work and retain clients passed on to them;
- A flexible and dynamic approach and mindset to respond to changing business/market requirements.

## What we offer:

With a growing reputation in the industry, and for the right candidate, will offer a competitive and comprehensive remuneration package and a clear and defined career progression for ambitious candidates. Training and development aren't optional extras: we will motivate you to perform at your peak, recognising your achievements and rewarding them appropriately. We are highly committed in supporting our staff becoming CIWEM chartered. Unda Consulting are an Equal Opportunities Employer in a professional but fun environment.
